

# INTERNSHIP PROGRAM

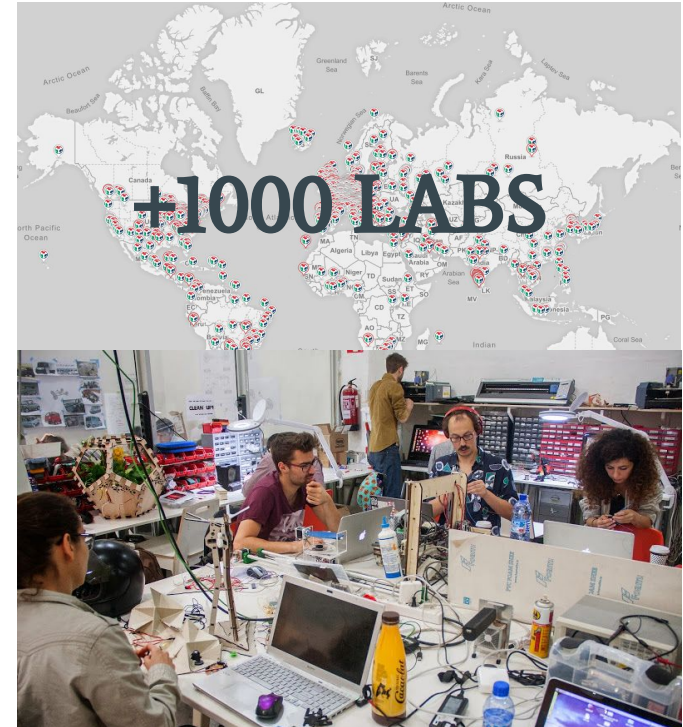

FAB LAB BARCELONA

# FAB LAB BARCELONA

Fab Lab Barcelona, part IAAC Foundation, is one of the leading laboratories of the worldwide Fab Lab Network. It is a hub for production, innovation, education and research, equipped with digital fabrication tools and technologies.

It is the home of the Fab City Research Lab that centers its efforts in the development of a wide range of projects aiming to generate locally productive and globally connected cities, powered by advanced technologies in the hands of citizens.

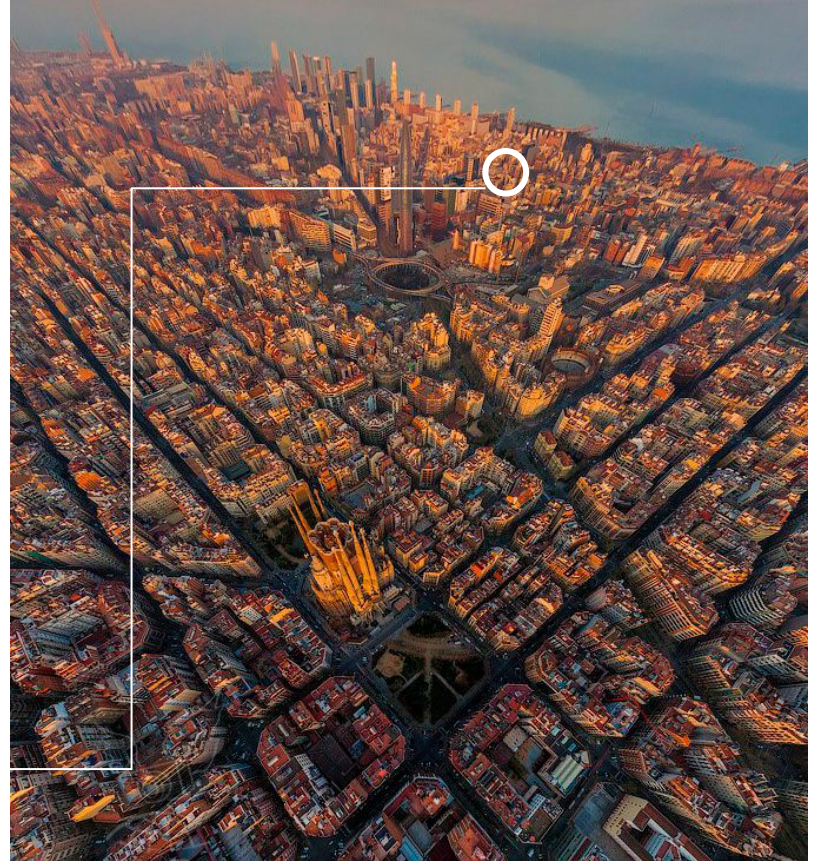

# WHERE ARE WE?

FAB LAB BARCELONA - IAAC is based in the 22@Barcelona district (Poblenou), the “Makers District”, an international reference of innovation and technology district. In 22@ district, cutting-edge companies, universities, research, training and transfer of technology centres, that constitute the system of innovation are integrated with different agents of promotion that facilitate interaction and communication among them.

Barcelona is an urban laboratory of research and innovation in digital technologies of communication and interaction.

This urban hub is supporting entrepreneurs in the area, create innovation clusters, looks for talent and serves as a model for developing solutions that could be exported in the world.

# WHAT WE DO?

We focus our efforts in 3 main areas:

**EDUCATION:** formal programs such as Fab Academy, Bio Academy and Fabricademy; short programs and workshops for kids & adults

**RESEARCH:** from hardware & software, to pilots and prototypes for future cities

**PRODUCT & SERVICES:** prototyping for companies, professionals and students; immersive activities design for fitting specific needs; conferences and events.

# PROGRAM GOALS

- To provide work experience in a Fab Lab environment
- To offer real experience related to the applications and implications of Digital Fabrication
